

Hiring: Dedicated Freelancers for AI & Automation Projects

1) AI Voice Receptionist Developer (Twilio + OpenAI + CRM + WhatsApp)

- Twilio Voice integration (STT → LLM → TTS pipeline)
- OpenAI function calling
- CRM integration (fetch/create/update/book)
- WhatsApp integration (shared backend intelligence layer)
- Low latency response (1–2 sec target)
- Clean, scalable backend architecture
- Production-ready deployment

Budget: \$100–\$150 (Fixed / Milestone-based depending on scope)

2) AI Voice Bot Developer (Prototype v1)

- Twilio inbound voice handling
- Speech-to-Text + Text-to-Speech integration
- LLM conversational logic
- 1–2 backend API integrations
- Deployable working prototype

Budget: \$100–\$150 (Fixed / Milestone-based depending on scope)

3) Autonomous Trading Bot Developer (BingX + Telegram Controls)

- BingX API integration
- Automated trade execution (TP/SL)
- Strategy implementation (logic provided)
- Telegram command controls

- Trade logging & error handling
- Secure API key management

Budget: \$100–\$150 (Fixed / Milestone-based depending on scope)

4) Outreach & Lead Generation Specialist (AI SaaS – Healthcare & E-commerce)

- Build prospect lists
- LinkedIn & Email outreach campaigns
- Multi-channel automation
- Demo booking & B2B qualification

Budget: \$100–\$150 (Fixed / Milestone-based depending on scope)
